Web Dev. Bootcamp
IOS & Swift Bootcamp
Game Develop with Unity
Leadership
Project Management

Languages

English [Advanced]
Spanish [Native]

Education

Information Technology
Bachelor's degree
ITLM [Mexico]
1992-1997

Personal Projects - Mobile Apps

- I have created and published 3 apps on Android and IOS store with more than 200k downloads, has been in top 10 most used financial apps and highly recommended by main technology gurus in Mexico and technology sites as xataka

- Dollar in Mexico is a financial Android and IOs app that shows the dollar price in main banks of Mexico and several metrics in real time.
  Technology used: Android studio, Xamarin, Java, Kotlin, C#, Json, Net Core for auto post on Facebook and twitter

  IOS Store: https://apple.co/2WsCnaE
  Android Store: https://bit.ly/2WucvLj

Work Experience

02/2017-Present
Sr Software Developer / Team Leader • Carl Zeiss

- I created and lead a software development group for operations and support groups, developing a dozen of web and windows apps that helped to bring the digital factory concept to the company.

- I Developed a smart factory traceability system to manage everyday operations with automatic data collection, visualization in real-time dashboards and several analytics reports.
  Technology used: SqlServer, C#, ASP.NET, JavaScript, jQuery, Bootstrap, High Chart, HTML5

1999- 02/2017
Sr Software Developer / Team Leader • Foxconn

- Team Leader that developed a traceability system to validate product flow and keep key data as key devices, defects, inspections, etc. allowing to improve business visibility and transparency.
  Technology used: Oracle 9i DB, C#, ASP.NET, Asp API, jQuery, json, High Chart, HTML5, CSS

- I Created a key system to manage, distribute and trace TV digital keys as mac address. System core relies in Database store procedures giving an optimal response in a high demand environment as prod environment.
  Technology used: Oracle 9i DB, C#, ASP.NET, Asp APIs, jQuery, json, High Chart, HTML, CSS
